

# Letter of Support Template

## **Subject: Boardable: Would Love Your Support In This Decision**

Dear Fellow Board Members,

I'm excited to share a tool that I believe could make a significant difference for us: Boardable. After learning about it, I'm confident it can streamline our work, simplify collaboration, and keep us focused on our mission.

Boardable is designed specifically for nonprofits like ours. It offers a centralized platform for meeting agendas, documents, communications, and follow-ups. That means less time spent tracking down files or digging through email threads, and more time making meaningful progress together.

To learn more, I'd encourage you to watch this quick video. [You may also want to invite them to join the trial or provide more details on what the next steps are in the decision making process.] I think you'll see right away how much easier it could make our board experience.

Thank you for your ongoing dedication and commitment to improving how we work together. I'm really looking forward to hearing your thoughts as we explore whether Boardable is the right fit for us.

Best,

[Your Name]
